Farmers Mix Your Own Fertilizers.

Do you know that home-mixing of fertilizers has proved to be the most economical and satisfactory method of procuring fertilizers? It is now generaly conceded by up-to-date agriculturists that better results are obtained by buying the crude materials and mixing fertilizers especially adapted to the different crops you raise, and the varying condi-

tions of the soil found on the farm. If you will send us your name on a postal with a request therefor, we will send you free, postpaid, a number of formulas which were made up for us by the Director of the Vermont Experiment Station and which have been used by many Vermont farmers with excellent success. We will also give full directions for mixing fertilizers adapted to all the crops commonly raised on Vermont farms. When writing please mention this paper. Address CARROLL S. PAGE, Hyde Park, Vt.
